Professional Summary

Passionate Data Scientist with 4 years of experience building and deploying machine learning models to solve business problems. Expert in statistical analysis, natural language processing (NLP), and big data engineering.

Technical Skills

Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, NLP, NLTK, Regression, Clustering, Classification, Statistics, Git, GCP, BigQuery

Professional Experience

Data Scientist at AnalyticsCorp (2023 - Present)

Developed clustering and classification models using Scikit-learn to segment customer behavior, resulting in a 12% increase in retention. Engineered natural language processing (NLP) pipelines using NLTK and SpaCy for sentiment analysis.

Junior Data Analyst at DataTech Solutions (2022 - 2023)

Prepared clean datasets for analysis using Pandas and NumPy. Performed statistical tests and designed SQL queries in BigQuery to compile KPI reports for executive stakeholders.

Education

Master of Science in Data Science - Columbia University (2022)
