CAREER OBJECTIVE

Motivated and enthusiastic 2nd-year B.Tech student in Artificial Intelligence and Machine Learning with hands-on experience in Python, MERN stack development, and AI-based projects. Seeking opportunities as a Generative AI Developer to apply skills in machine learning, prompt engineering, RAG pipelines, and intelligent application development while contributing to innovative real-world solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++

Generative AI & LLMs: RAG Pipelines, LLMs, NLP, Prompt Engineering, Pinecone, FAISS, LangChain

Machine Learning: Scikit-learn, XGBoost, TensorFlow, PyTorch, EDA, Feature Engineering, XAI / Model Interpretability

MERN Stack: MongoDB, Express.js, React.js, Node.js, Next.js

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Frameworks: Flask, Tailwind CSS, Bootstrap

Frontend: HTML, CSS, GSAP, Three.js

Tools & Platforms: Git, GitHub, Postman, MySQL, Google Colab, Jupyter Notebook, VS Code

PROJECT EXPERIENCE

XAI-Based Machine Learning System

My Role: AI Integration Developer & Frontend | Group Project

- Engineered an interpretable ML system using Explainable AI (SHAP / LIME) to expose reasoning behind predictions, improving decision transparency for real-world datasets.
- Performed feature importance analysis and model evaluation, building a fully explainable, high-accuracy prediction pipeline.
- Developed an interactive React.js dashboard to visualize XAI outputs, enabling non-technical stakeholders to interpret and validate model decisions.

Mind OS — Personal Productivity & AI Management System

- Built a full-stack AI-powered productivity platform integrating task management, note-taking, and decision workflows using the MERN stack.
- Implemented intelligent automation features and AI-driven suggestions to streamline daily activity management and reduce manual overhead.
- Designed a responsive UI with Tailwind CSS, ensuring a seamless experience across desktop and mobile devices.

PyBot — Python-Based Automation Chatbot

- Developed a command-driven chatbot using Python to automate user tasks, process natural language commands, and execute programmed responses.
- Designed modular task-execution handlers supporting 10+ command types for flexible daily automation use cases.

AI Odyssey Event Website

- Designed and deployed the official website for the AI Odyssey event, handling registration and announcements for 200+ participants.
- Built fully responsive pages using React.js, GSAP animations, and Three.js for an engaging cross-device participant experience.
- Managed end-to-end deployment including website architecture, navigation flow, and accessibility.

CERTIFICATIONS & COURSES

- **MERN Stack Developer Course** — Code with Harry · Udemy
- **RAG Pipelines & LLM Applications Masterclass** — Scaler
- **Data Science & AI Global Career Development** — Scaler
- **MAANG Engineer Roadmap Masterclass** — Scaler

EDUCATION

G.H. Raison College of Engineering, Nagpur | 2024 – 2028

B.Tech — Computer Science & Engineering (AI & ML Specialization)

Shri Shivaji Science College, Nagpur | 2022 – 2024

Higher Secondary Certificate (HSC)

Percentage: 62.60%

Beharilal Khandelwal Comprehensive Public School, Nagpur | 2022

Secondary School Certificate (SSC)

Percentage: 85.60%

HACKATHONS & ACTIVITIES

- Smart India Hackathon (SIH) Participant — collaborated on real-world national-level engineering problem statements.
- Technical Member, Jarvis Forum, GHRCE — active contributor to the college technical and innovation community.
